Professional Summary

Computer Science student specializing in Data Analytics with strong skills in Java, Python, full-stack web development, and machine learning. Experienced in building secure authentication systems, predictive models, and data-driven applications. Strong foundation in object-oriented programming, RESTful APIs, and database management with hands-on project experience.

Education

VIT-AP University, Amaravati
B.Tech in Computer Science and Engineering (Data Analytics) September 2024 – Present
CGPA: **8.44**

Skills

Data Structures & Algorithms: Arrays, Strings, Linked Lists, Stacks, Queues, HashMap, Trees, Graphs, Sorting, Searching, Recursion, Dynamic Programming

Programming Languages: Python, C, C++, Java (OOP, Multithreading, Exception Handling), R

Frontend Technologies: HTML, CSS, JavaScript, React.js

Backend Technologies: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB, Firebase, Supabase

Data Analytics & Machine Learning: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Projects

1. **Customer Churn Prediction**

   Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

   - Cleaned and preprocessed customer data for analytical modeling.
   - Developed a Logistic Regression model to predict customer churn.

2. **Inventory Management System**

   Tech Stack: Python, Flask, MySQL, HTML, CSS, Matplotlib

   - Developed a full-stack web application for real-time inventory tracking.
   - Automated stock updates after sales and purchase transactions.

3. **Hand Gesture Controlled 2D Game**

   Tech Stack: Java, JavaFX, Swing, OpenCV

   - Implemented OpenCV-based hand gesture recognition for real-time player control and in-game actions.
   - Designed interactive HUD and menu interfaces using JavaFX and integrated gestures with game logic.

Certifications

- Google Developer Sprint 2025- Participation Certificate
- Java Certification – Coding Ninjas
